3. (S/NF/SK) Tasking: Describe the target of interest.

4. (S/NF/SK) Results:

a. The beginning of the session, I perceived a general ~~area of open~~ ~~land~~ with what appeared to be freshly plowed or upturned dirt. ~~A very large~~ ~~object~~ was perceived in connection to the dirt, and there was a slanted motion involved. At one point, the "slanted motion" appeared to be a set of physical inverted "L's" (see transcript, page 3).

b. About half way through the session, 003 entered the adjacent room to begin a session. I continued to work, but began getting a completely different set of perceptions. After a few minutes, I realized that I was now working 003's site. I took a break and returned to try again, but was again "stuck" on 003's site. I postponed further work until the next morning.
